Proudly connected to country pride at the Wentworth Show.

Right now, something big has happened just beyond the showgrounds. EnergyConnect, one of the most significant energy projects in Australia, has taken shape here in Wentworth Shire.

EnergyConnect has connected the electricity systems of New South Wales, South Australia and Victoria for the first time, making our energy grid stronger and ready for what's next.

But this isn't just about the energy grid we're building; it's about the legacy we're enabling.

And this includes real outcomes to the region:

- More than \$235 million invested across the Riverina, Murray and Sunraysia, involving over 300 local and First Nations businesses
- Support for dozens of community groups, helping fund local events, facilities and services
- Smarter, more sustainable construction that protects wildlife, reduces clearing and cuts waste

As construction continues east toward Wagga Wagga, we'll keep working closely with landholders and local partners, making sure the benefits of this once-in-a-generation project stay local, and last long into the future.
